United Nations Register of Conventional Arms

Report of the Secretary-General

Summary

The present report is the fourteenth consolidated report issued by the Secretary-General since the establishment of the Register.** It contains data and information provided by 101 Governments on the international transfers of major conventional arms covered under the Register and/or additional background information for the calendar year 2005. Any additional replies received from Governments will be issued as addenda to the present report.

The replies received are contained in section II of the present report. Section III contains an index of background information submitted by Governments on military holdings, procurement through national production, international transfers of small arms and light weapons and national policies. Replies received on military holdings and procurement through national production are contained in section IV.

Information received from Governments on small arms and light weapons and national policies is available for consultation at the Department for Disarmament Affairs of the Secretariat.

All relevant information on the Register is available electronically on the Department's Register website at http://disarmament2.un.org/cab/register.html.

* A/61/150.

I. Introduction

1. The present report is the fourteenth consolidated report on the United Nations Register of Conventional Arms, and is submitted pursuant to General Assembly resolution 60/226 of 23 December 2005.

2. Due to the non-availability of extrabudgetary funds, the Department for Disarmament Affairs was unable to sustain its programme of regional or subregional workshops to enhance awareness of the Register and to encourage greater participation in it. Within available resources, however, the Department engaged in a number of activities related to the Register. In October 2005, on the margin of the First Committee, the Department organized and coordinated an informal meeting of delegates on issues related to the United Nations Register, including matters likely to be addressed during the 2006 review of the Register's operation and further development. In March 2006, the Department posted a document on its website entitled "Guidelines for reporting international transfers: questions and answers". The primary purpose of the publication is to assist States in the reporting of arms transfers to the United Nations Register. In July 2006, the Department also posted a document entitled "Tables and graphs", which provides information on various aspects of participation by States in the United Nations Register at the global and regional levels. In addition, the Department engaged in informal consultations with Member States, with a view to encouraging and facilitating their participation in the Register.

II. Information received from Governments[1]

3. Information received from Governments is presented below as follows: a composite table listing all the replies received by the Secretary-General (sect. A) and an index of individual replies of Governments (sect. B). Where appropriate, the relevant parts of notes verbales are reproduced.

4. The composite table is provided for ease of reference. As regards the information contained in the table, it should be noted that a "yes" denotes a submission of data regarding imports and/or exports in relation to the seven categories of arms covered by the Register during the reporting period. For the purpose of uniform tabulation, responses by Governments that contained either "nil", "none", "0", a dash (-) or which otherwise indicated that no exports and/or imports in the categories covered by the Register had taken place are reflected in the tables as "nil" reports. A blank space under data on imports and/or exports in the composite table indicates that no information was provided. In some cases, however, an explanation can be found in the note verbale of the country in question, as indicated above. Only those parts of the standardized forms that contain specific data and notes verbales of Governments providing relevant information are reproduced in section B. Replies in the standardized reporting forms and the simplified "nil" reporting form or in notes verbales containing "nil" or blank reports are listed in the composite table only.

[1] Documents have been reproduced as received; the designations employed do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area, or of its authorities.

[1] 70 Leopard C2s have been declared surplus.
[2] The Grizzly APC has been declared surplus to CF requirements. 100 vehicles are on loan to the African Union mission in Darfur, Sudan. All others remaining in Canada (157) have been pulled from service.
[3] 548 vehicles have been declared surplus.
[4] This piece of equipment was reported as "A3" in previous UNCAR reports. This typographical error has been corrected.
[5] Canada holds 175 Cougars that have been declared surplus and are in the disposal process. The figure reported in 2004 (100) reflected the vehicles in service at that time and did not take into account the 75 vehicles that were declared surplus.
[6] All M109s were declared surplus.
[7] 39 C1 Howitzer 105mm have been declared surplus.
[8] Procured in 2005, as reported elsewhere in this report.
[9] No information provided for national security reasons.

[10] Because these vehicles have been acquired "less kits," it is not yet certain whether they will meet the definition for Section II Armoured Combat Vehicles (e.g., they may become LAV variants that do not meet the definitional requirement for crew number). We are reporting this procurement through production in the interests of transparency and openness.
